

### THE PROBLEMS

- Drain line blockages
- Drain line odors
- Frequent grease interceptor pump-outs
- Drain fly infestations

GOING...

GOING...

BLOCKED!

BESTECH BIOFEED FS

### THE SOLUTION

#### **BESTech Biofeed<sup>®</sup>: A COMPREHENSIVE TWO-PART DRAIN TREATMENT**

Biofeed FS is automatically dispensed into the primary drain line around the clock, eliminating back-ups (when combined with Best Management Practices) and odors, and reducing the frequency of grease interceptor pump-outs. Biofeed Spray is hand applied to all floor, sink and beverage tower drains by the service technician, supplementing the action of Biofeed FS, and reducing or eliminating drain fly infestation. A one-two knockout of grease-based drain line problems!

BESTECH BIOFEED SPRAY

**EFFECTIVE:** Proprietary blend of benign, naturally-occurring vegetative bacteria. Proven to be a highly effective system for eliminating fat, oil, grease (FOG), sugar and starch in drain lines. Developed in cooperation with research scientists at Iowa State University. Hundreds of thousands of 30-day BESTech Biofeed bladder bags sold since 1992.

**ENVIRONMENTALLY FRIENDLY:** Contains no chemicals (surfactants, emulsifiers, detergents, etc.). BESTech Biofeed is a blend of benign, naturally occurring bacteria that actually convert fat, oil, grease (FOG), sugar and starch to carbon dioxide and water, instead of merely moving them further down the drain line.

**EASY TO USE:** Biofeed FS dispenser installs out of the way in a small footprint. Battery powered. No plumbing required. Professionally maintained through a complete service package provided by one of our many qualified distributors.

<b>BIOFEED BENEFITS / FEATURES</b> <i>(when combined with Best Management Practices)</i>	<b>RESULTS</b>
<b>Eliminates lost business due to rush-hour drain line blockages</b>	<ul style="list-style-type: none"> <li>• <b>Increased revenue</b></li> <li>• <b>Reduced plumbing bills</b></li> </ul>
<b>Reduces frequency of pumping of grease interceptor and drain line jetting</b>	<ul style="list-style-type: none"> <li>• <b>Less drain line wear &amp; tear and lower operating costs</b></li> </ul>
